Optimal Predictor Machine

problem-dependent

Optimal Predictor Machine

✓ mathematically guaranteed **optimal** outcome, by design → unbeatable!

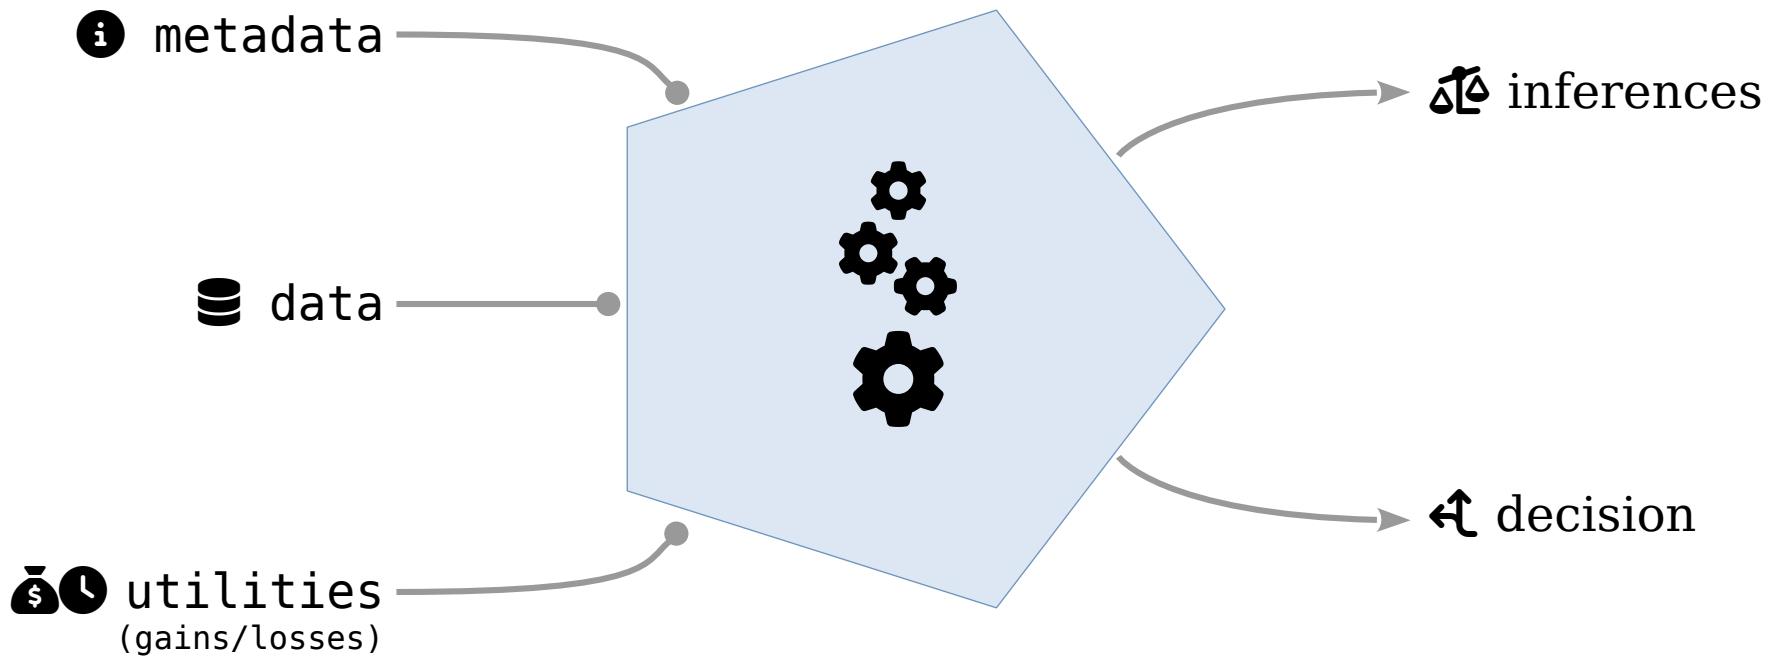

Optimal Predictor Machine

✓ mathematically guaranteed **optimal** outcome, by design → unbeatable!

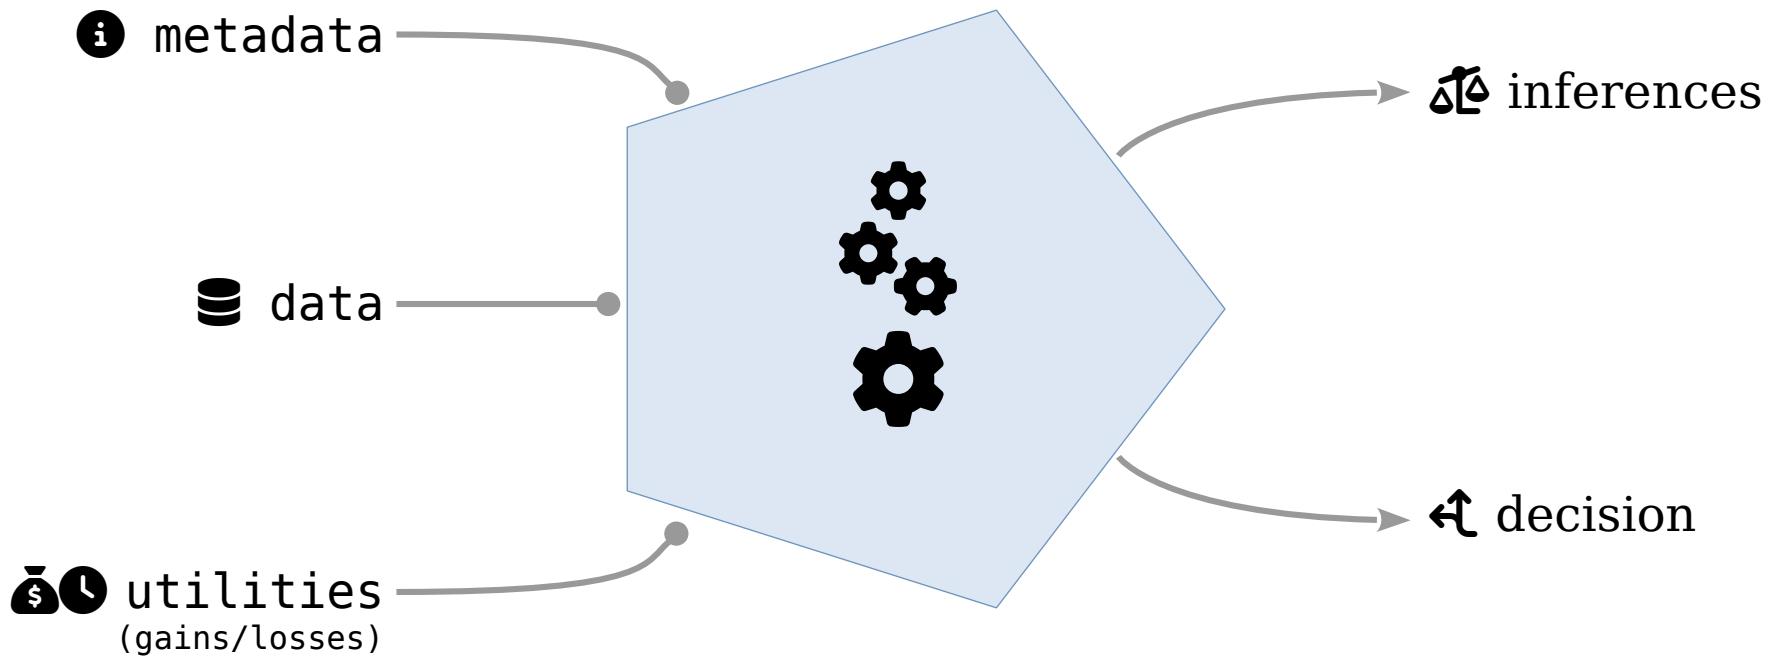

Optimal Predictor Machine

- ✓ mathematically guaranteed **optimal** outcome, by design → unbeatable!
- ✓ mathematically guaranteed maximally-informative output

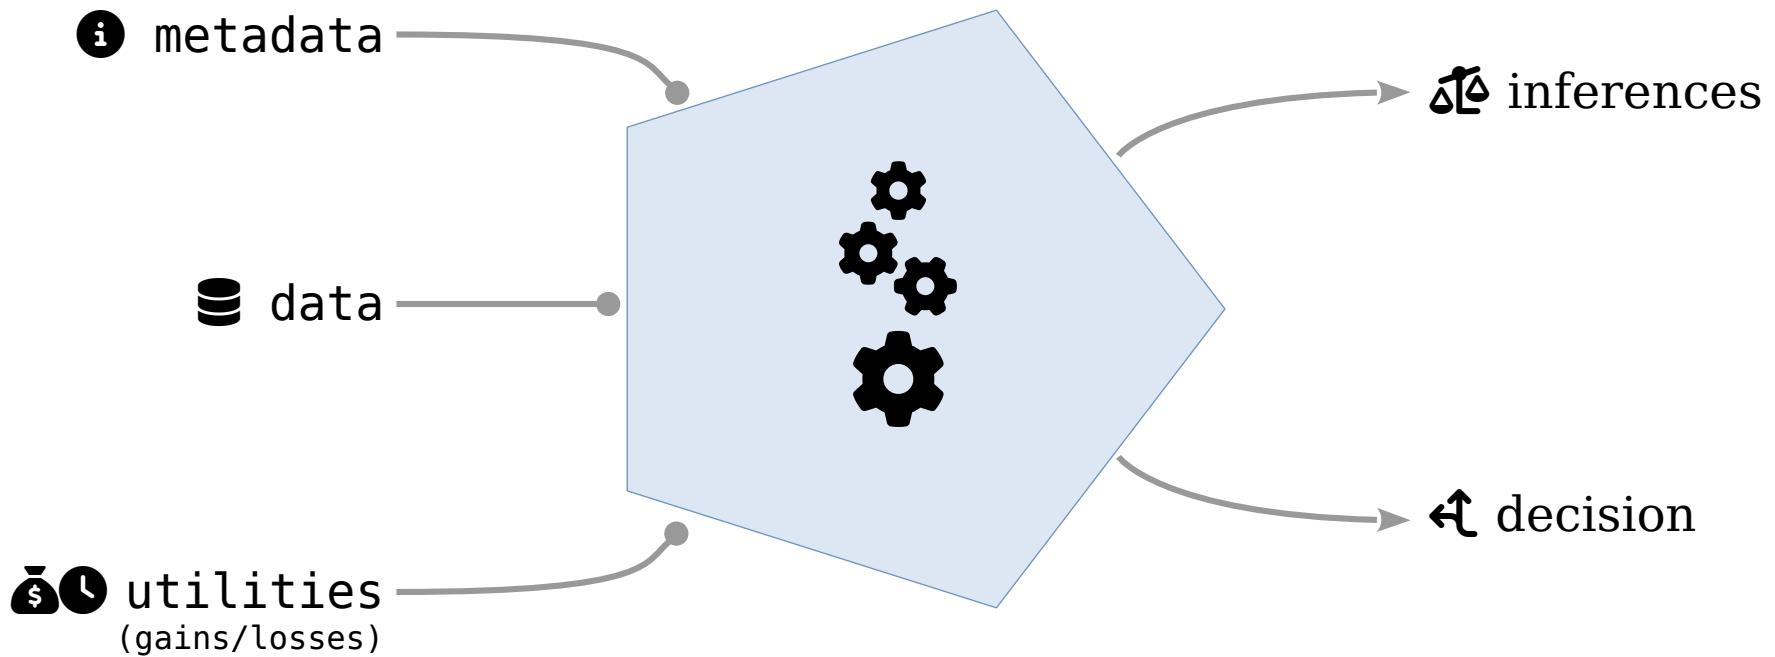

Optimal Predictor Machine

- ✓ mathematically guaranteed **optimal** outcome, by design → unbeatable!
- ✓ mathematically guaranteed maximally-informative output
- ✓ learning is built-in

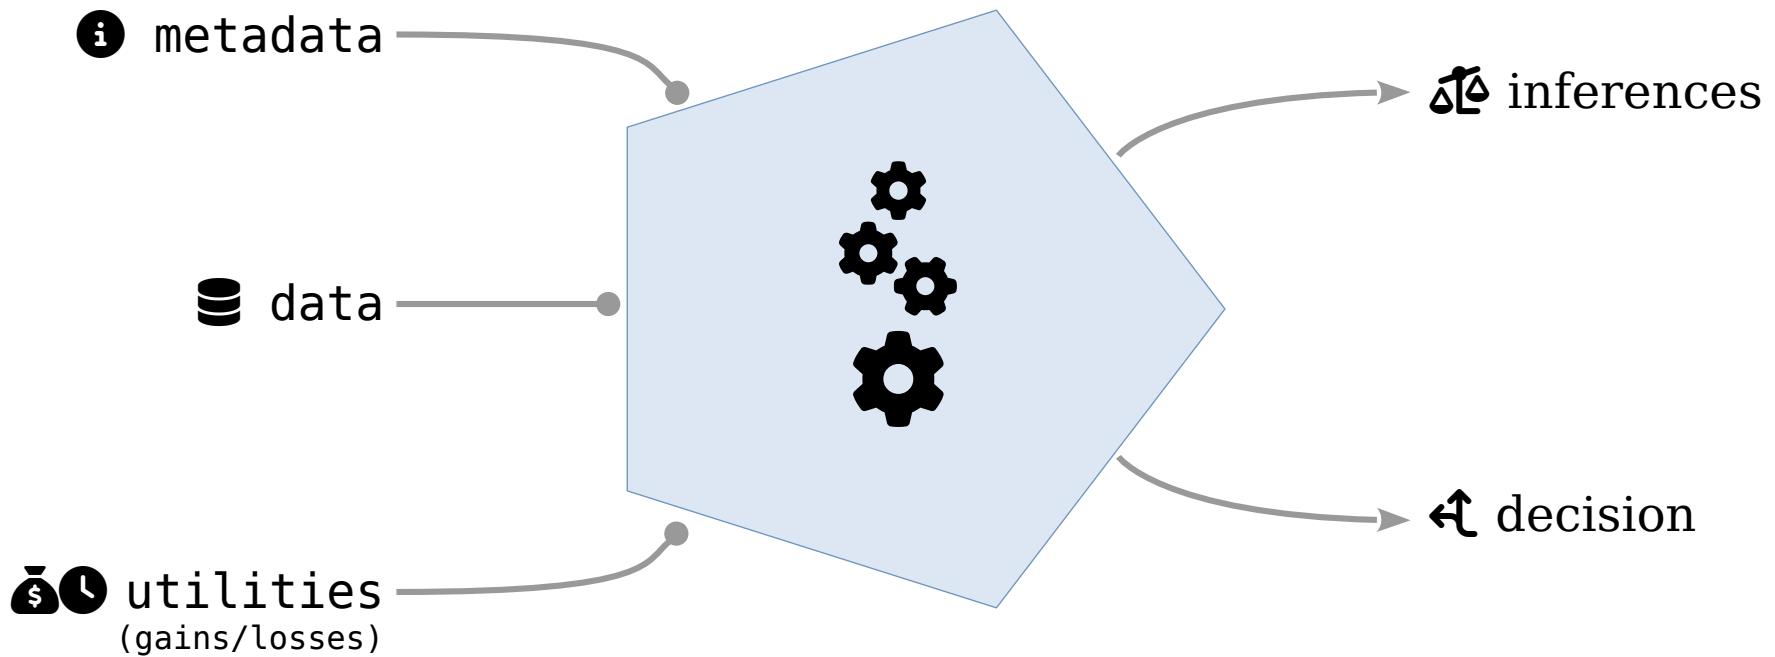

Optimal Predictor Machine

- ✓ mathematically guaranteed **optimal** outcome, by design → unbeatable!
- ✓ mathematically guaranteed maximally-informative output
- ✓ learning is built-in
- ✓ no need to handle “un/supervised” or “discriminative/generative” differently

Optimal Predictor Machine

- ✓ mathematically guaranteed **optimal** outcome, by design → unbeatable!
- ✓ mathematically guaranteed maximally-informative output
- ✓ learning is built-in
- ✓ no need to handle “un/supervised” or “discriminative/generative” differently
- ✓ no need for data splits, cross-validation, under/overfit... (all implicit in how it works)

$$P(\neg Y | X) = 1 - P(Y | X)$$
$$P(Z \wedge Y | X) = P(Z | Y \wedge X) \cdot P(Y | X)$$
$$P(Z \vee Y | X) = P(Z | X) + P(Y | X) - P(Z \wedge Y | X)$$

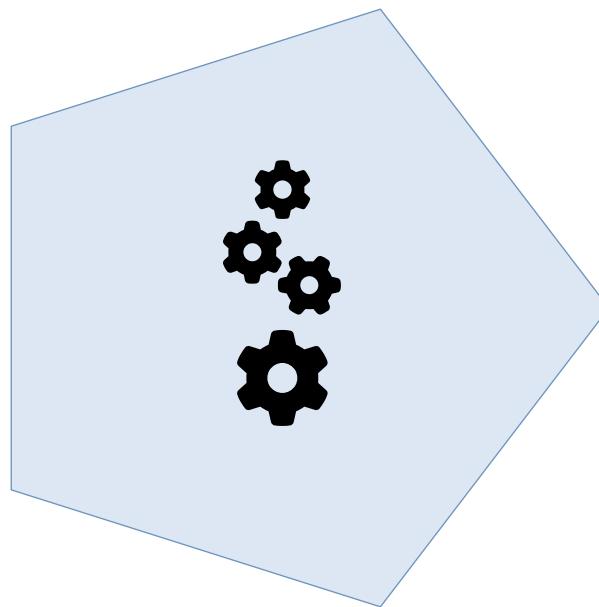

choose $\arg \max_D U(D | Y \wedge X) \cdot P(Y | D \wedge X)$

the machine works by **4 fundamental mechanisms**

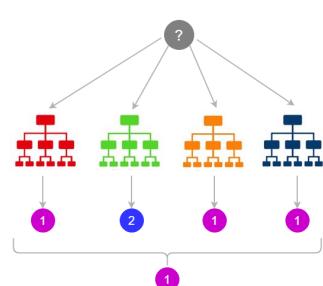

“laws of robotics”
for **AI** dealing with *uncertainty & decision-making*

Breaking the laws → logical inconsistency & suboptimality

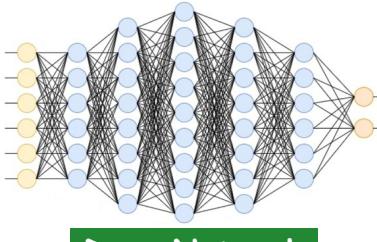

Optimal Predictor Machine

The screenshot shows the course page for 'ADA511 0.1 Data science and data-driven engineering'. At the top, there's a sidebar with navigation links like 'Dear student and aspiring data engineer', 'Preface', 'An invitation', 'Inference I', and 'Data I'. The main content area features a title card with the course name and authors (Steffen Mæland and PierGianLuca Porta Mana). Below the title card is a section titled 'Dear student and aspiring data engineer' with a quote from U.Schinnerer: 'If you can't join 'em, beat 'em.' The page also includes a table of contents on the right side.

Thank you!
